

## **Guys: Clothing tips and Guidelines**

Facial hair should be neatly groomed or freshly shaved. Make sure that your clothes are neatly prepared for your session. (I know, we guys like the “comfortable look” which basically means that if it’s on the top of the pile or draped over our favorite “holding area” and doesn’t walk across the room by itself, it’s good to go. Trust me on this one. If mom doesn’t like the way it looks ... Guess what? Yep. We get to do it all again!)

**Basics:** Two or three outfits per session module that you have reserved. Feel free to bring one or two alternatives just in case. Solid colors are traditionally best for portraits, but that doesn’t mean that EVERYTHING has to be a solid color. Some session modules lend themselves to clothing with a little more pattern and flair. NOTE: If you have a favorite outfit BRING IT! It doesn’t matter what it is, provided that it has parental approval and no profanity. If you like it you will look comfortable and the portrait that we create will be a true character study.
